Lobbysign LED

standing out

LobbysignLED

The LobbysignLED is at the forefront of visual communications, giving maximum impact to your messages, notices and important information. Its contemporary design and ease of use are also essential qualities that make the LobbysignLED an invaluable tool for businesses and organisations to communicate and inform.

Powerful Communicator

The LobbysignLED is so eye-catching that it is impossible to ignore, whether it is showing a single message or running simple sequences of information. The "Portrait" style format of the display, by its nature, draws people's attention and makes reading appealing to viewers.

The LED panel offers high luminosity and clear lettering, which make it the perfect medium to communicate single or multiple messages in a short time. The LobbysignLED is the focal point in foyers, reception areas, lobbies and atriums.

Whether the LobbysignLED is standing in the reception of a company, leisure centre, school, college, university, library, hospital, surgery, council office, hotel, police headquarters, station, conference or exhibition centre, it has no equal in getting across the important information or message when it really matters.

Unique Appearance

The LobbysignLED's elegant and professional design, with its powder painted neutral finish and non-reflective acrylic gives the best first impression in both contemporary and traditional locations. Your own corporate identity is also maximised by applying a logo to the optional light box which is installed in the top of the LobbysignLED.

Easy to Operate by All Staff

The hand-held infrared keyboard makes programming easy. Pages can simply be selected from the memory and timed to display individually, or scheduled by time and date to appear exactly when they will have the most impact - in front of your targeted audience. Maximum effect is achieved when the people, to whom you need to communicate, receive information relevant to them, thereby making our timing and scheduling software an essential programming tool.

Technology and Service

The LobbysignLED requires no regular maintenance and is highly durable and reliable thanks to the use of top grade components and rigorous testing. Technological piece of mind is ensured by Brackenbury's professional back-up team, with its quick response, expertise and unrivalled after-sales service.

General Specifications

Height	1870mm
Width	680mm
Depth	105mm (in the middle)
Weight	44kg including stand
Character type	Green LED (light emitting diode)
Character matrix	7 x 5
Character height	30mm
Viewing distance	Up to 25 metres
Lines on display	8
Characters on display	160
LED options	Red, white or blue LEDs
Storage of text	Up to 100 pages of 8 lines
Programmed text	Pages selected, sequenced and timed individually
Scheduling	Time and date
Operation	Infrared keyboard, PC RS232, Network
Logo (option)	Printed on film, stuck inside lightbox at top of display
Power consumption	220v AC - 200w max / 110v AC 400w max
