

LobbysignSlim

Standing Displays

standing out

LobbysignSlim

The LobbysignSlim is at the forefront of digital signage, combining visual high technology, contemporary elegance and portability. Its design, impact and ease of use are the essential qualities that make the LobbysignSlim an invaluable tool for businesses and organisations to communicate and inform.

Screen Impact

The LobbysignSlim gives unique impact to all kinds of information and images displayed. The "Portrait" format of the screen inside the housing, by its nature, draws peoples' attention and makes reading and viewing images appealing.

Bespoke and dynamic sequences of pages appear with text either on coloured backgrounds or blended with any choice of images. Whether it be notices, messages, announcements or events, the LobbysignSlim is hard to ignore.

Unique Appearance

The Lobbysign's sleek and professional design gives the best first impression in both contemporary and traditional locations. The powder painted neutral surround provides a clean background to give maximum effect to the illuminated screen.

LobbysignSlim with PC or Media Player

The LobbysignSlim with inbuilt PC and our own software, has been specially developed to enable users to enter and modify messages simply and easily.

The alternative is a media player which enables pre-prepared images and text to be displayed, simply by inserting a memory stick.

Technology and Service

The LobbysignSlim requires no regular maintenance and is highly durable and reliable thanks to the use of top grade components. Technological piece of mind is ensured by Brackenburg's professional back-up team, with its quick response, expertise and unrivalled after-sales service.
